

eKonnnect Test Access

eKonnnect runs in two places: the Android app people carry, and the web console the network is run from. Both start at ekonnnectapp.web.app, and they share one set of test accounts.

Get the app Android

Download it from ekonnnectapp.web.app/#get. Allow the prompts as they come.

BEFORE YOU INSTALL

It is not on the Play Store yet, so Android will warn you against installing it. Choose **Install anyway** — the warning is about the source, not the app.

Try the app two roles, two accounts

The same app serves both sides of an emergency. Sign in as either — or as both, on two phones, to watch one call from end to end.

As a user — raising an emergency	As a responder — answering one
Email: phabianbenard2019@gmail.com Password: Phabby@254	Email: tafitiinnovationhub@gmail.com Password: Phabby@254
1. Sign in with Google in one tap, or with the email and password above. 2. Pick an emergency type, then hold the SOS button for a second — the hold is the confirmation. 3. Watch the map: your face and the responders are the two pins. 4. Drag the sheet down for the map, up for the crew's details.	1. Sign in, then switch to responder mode. 2. Turn Accepting emergency calls on — until that switch is on, nothing reaches you. 3. Accept the incoming call, then work it through to resolved. 4. This account is already verified, so it can go on duty straight away.

The web console ekonnnectapp.web.app/login

One sign-in page for both roles — ekonnnectapp.web.app/login. Where you land is decided by the account, not by the link.

Test credentials

Care Point — Oasis hospital lands on /portal	Email: phabianbenard2019@gmail.com	Register a Care Point Fills in the facility, its location, the emergencies it answers and its fleet. Choose “Who you answer for” here: Public or Private. ekonnnectapp.web.app/register
	Password: Phabby@254	
Network administrator lands on /dashboard	Email: ekonnnectadmin@gmail.com	
	Password: Ekonnnect@2026	
A responder	A driver or practitioner — can be registered two ways: Either way an administrator verifies the licence before that account can go on duty. Until then the duty switch stays locked.	By their Care Point From the portal: Crew → Register crew. The facility submits someone it employs, and they inherit that facility’s reach. ekonnnectapp.web.app/login → /portal
		On their own They apply themselves and either tag one of the verified Care Points, or choose “I work independently”. ekonnnectapp.web.app/apply
